FILE: UBC.RET
WP5.1
Prepared by Karen Poppe

Within this binder are the contents of the UBC.RET file. This file is a complete database/list of all returned *Unified Braille Code* questionnaires as of the end of May 1995. It contains a total of 362 possible evaluators. For each possible evaluator the following information is given:

I.D. # **(Field 1)**
Name **(Field 2)**
Address **(Field 3)**
Salutation **(Field 4)**
Phone Number **(Field 5)**
Category (i.e., Braille Reader, Teacher, Transcriber) **(Field 6)**
Age **(Field 7)**
State or Province **(Field 8)**
Age at which evaluator learned braille [Braille Reader only] **(Field 9)**
Experience reading/teaching/transcribing braille (given in years) **(Field 10)**
Type of braille qualified to evaluate/teach/transcribe: literary braille (LB), mathematics (MT), physical science (PS), social science (SS), computer programming (CP), foreign language (FL), and/or other (OT) **(Field 11)**
Percent of reading in braille [Braille Reader only] **(Field 12)**
Reads braille by touch/sight/or both [Braille Reader only] **(Field 13)**
Prefer braille for: recreational reading (RC), non-technical reading (NT), technical reading (TN), reference (RF), notes and labels (NL), all reading (AR), and/or other (OT). [Braille Reader only] **(Field 14)**
Replied (Date entry was recorded) **(Field 15)**

Note: If a respondent is classified in more than one category (e.g., braille reader and teacher), two separate records were created--one for "Teacher" and one for "Braille Reader". Thus, information from two or three returned questionnaires from the same respondent were never combined into one record--this facilitates sorting of all respondents into the 3 categories (i.e., braille readers, teachers, and transcribers).
